Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/553,248	Applicant(s) BRUEGGERT ET AL.	
	Examiner MY-CHAU T. TRAN	Art Unit 2629	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 October 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Application and Claims Status

1. Applicant's preliminary amendment filed 10/23/2006 are acknowledged and entered.
2. Claims 1-24 were pending. Applicants have cancelled claims 1-24; and added claims 25-52. Therefore, claims 25-52 are currently pending and are under consideration in this Office Action. Additionally, applicant has amended the Abstract and filed a substitute specification. **However**, the substitute specification is **non-compliant** because it failed to meet the requirements of 37 CFR 1.121, specifically 37 CFR 1.121 (b)(3), and 37 CFR 1.125 (b) and (c). See also MPEP § 714. Here, applicant failed to provide a) a statement that the substitute specification includes no new matter, b) an instruction to replace the specification, and d) supply a clean version of the substitute specification.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 25-30, is drawn to an arrangement for the display of images of a scene or object with the structural features combination of a plane wavelength filter array arranged behind the image display device and a light emitting illuminator arranged behind the wavelength filter array.

Group II, claims 31-41, is drawn to an arrangement for the display of images of a scene or object with the structural features combination of an illuminating device arranged behind the image display device and the wavelength filter array having first and second positions.

Art Unit: 2629

Group III, claims 42-49, is drawn to an arrangement for the display of images of a scene or object with the structural feature a wavelength filter array having a front face and arranged in front of or behind the image display device.

Group IV, claims 50-52, is drawn to an arrangement for the display of images of a scene or object with the structural feature a wavelength filter array having a first mode of operation and a second mode of operation.

4. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-IV appears to be that they all relate to an autostereoscopic display comprising an image display device, a filter device, and a light emitting illuminator device. This special technical feature is well known in the art. Moreover, Eichenlaub et al. (US Patent 5,897,184) discloses an autostereoscopic display comprising a liquid crystal display, a 2-D/3-D variable diffuser, and an illuminating light guide (see e.g. Abstract; col. 3, lines 20-45; col. 9, line 17 thru col. 10, line 24; figs. 1, 9, and 10). Therefore, the technical feature linking Groups I-IV does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
